

Oxy Light

for Breathtaking, Vibrant Skin

Where did this technology come from?

The famed inventor, Nikola Tesla, first developed the technology used here over 100 years ago. Tesla invented a coil (cleverly called the Tesla coil) that could produce static electricity. He found out that this static electricity has many uses and that he could use his coil to make electricity jump through the air. (like a mini lightning storm) When we add energy to air in this way, the air undergoes a change. It ionizes.

People began experimenting with Tesla's technology and discovered lots of applications. Since then, excellent results have been reported in reducing lines and wrinkles, facial toning, puffy eyes, enlarged pores, acne and pimples, as well as to promote healthy scalp and hair.

This technology sends a gentle stream of impulses to renew dull, tired and aged looking skin, firming and toning ... giving a youthful lifted appearance. At the same time, this wand produces enriched oxygen to purify and re-texture the surface of the skin, without using harsh or abrasive chemicals. For pimple prone skin, the Wand provides anti-bacterial action that eliminates pimples often within one or two days.

The High Frequency Wand uses a slight amount of neon in the bulb to obtain an orange glow, which is more visible than the violet glow of the unique machine of Edgar Cayce, a famed healing intuitive. Neon has been recognized as being much more gentle on the skin than the Argon used in older machines of this type.

What is Oxy Light?

The electronics within the Oxy Light generate tiny pulses of electricity, like static electricity. Whenever static electricity passes through air, it ionizes the air. This provides an active environment for your moisturizer to work.

Oxy Light also produces a stimulating massage, without heat and without stretching. This stimulating massage allows your moisturizer to sink in to greater depths. The result is healthier looking skin.

We said Oxy Light does this without heat and without stretching. Heat is an enemy to your skin. It dries your skin and causes it to lose its natural moisture. Avoid using heat on your skin if possible. Stretching is also harmful to your skin. Continuous stretching will cause permanent deformation and slackening of your skin. This is also something to be avoided.

What can Oxy Light do?

The Oxy Light works with your moisturizer to enhance the appearance of your complexion.

In the 70's, estheticians realized that the Oxy Light technology could be used to improve the appearance of aging skin. By 1980, North American skin care professionals had begun using the technology and today this technology is taught in most esthetic schools.

The results of this are:

1. Improved skin color
2. Healthier glow
3. Reduction in puffy appearance

There are a number of benefits to using Oxy Lite for reducing the

appearance of aging:

Normal massage, while good for your muscles, is not good for your skin. It stretches your skin to cause permanent elongation of delicate tissue. Oxy Lite on the other hand, massages by patting the skin. This patting action allows for a massage without stretching. This massage helps by improving moisturizer penetration.

Improved penetration – Your skin is fed from the outside using moisturizers and skin care lotions. The massaging action of the Oxy Lite will improve the penetration of these products down to the many layers. Some of these layers have never been fed before and now, with Oxy Lite, you will begin to see improved life in your complexion.

Oxy Lite -- Delivers corrective results for:

- **ACNE & ENLARGED PORES:** oxygenates to purify properly and restore a clear complexion without harsh abrasive methods.
- **PUFFY EYES:** stimulates to flush away excess fluid while tightening up the fragile under eye area...WHAT A RELIEF!

- **A FRESHENING LIFT!**
- **WRINKLES:** With daily use of the System, wrinkles and fine lines seem to dissolve with ease.
- **THINNING HAIR:** Revitalizes the scalp with the purifying and stimulating response of the Oxy Lite. Just 2 to 3 minutes a day will encourage healthier appearing hair growth.

This System Includes:

- **Oxy Lite**
- **OXY Wrinkle Control**
- **Oxy Acne Control**
- The Oxy Lite itself is about realistic and reliable results. This high frequency tool has received advanced technology to create a milder stimulation sensation, with increased performance. The sleek design is more comfortable to handle and the new ac adaptor plug does not require batteries.
- A licensed FDA drug manufacturer manufactures Oxy Wrinkle Control.
- The OXY Wrinkle Control when applied prior to using the Oxy Lite will treat the signs of aging. Replenishing the skin, instead of depleting it.

- The combination of the Oxy Lite with Wrinkle Control will energize, tighten saggy, lazy skin and ease the appearance of wrinkles.
- The Oxy-Acne Control contains FDA approved ingredients that, when applied before use, will work synergistically with the Oxy Lite to reduce inflammation, swelling and redness.
- A calming ingredient is added to sooth and soften angry skin.
- Use Oxy-Acne after using Oxy Light for all day protection and to restore a beautiful clear complexion.
- Oxy Light is hand held, lightweight and compact....very easy to use.
- Includes an attractive travel case, user's manual and 1year warranty. 110v use only.
